

INESSS invitations to submit a drug listing or re-evaluation request

When the Institut national d'excellence en santé et en services sociaux (INESSS) receives formal requests from patients, Quebec healthcare professionals, the MSSS or the RAMQ for the evaluation or re-evaluation of a drug, or a revision of reimbursement indications that it considers justified, it systematically invites the relevant manufacturers to submit a listing or re-evaluation request according to established standards, or to formally justify any refusal to do so. INESSS may also initiate such invitations when issues are identified regarding drug reimbursement in Quebec (e.g. product listing withdrawal).

Should a manufacturer fail to return a formal response (i.e. either a refusal or an approval) within 30 days following the invitation, the request status will automatically be changed to "Refused".
